① WITH VIBRATION ISOLATORS

Appendix E

Unit Information

COMMERCIAL UNITS

There are three Commercial Units (use group 6). The unit areas are as follows:

Unit	Floor	Area
A	Ground	3,159 SF
A	Mezzanine	530 SF
A	Cellar	3,350 SF
Total unit A		7,039 SF
B	Sub Cellar	1,412 SF
C	Sub Cellar	106 SF

The Sponsor has indicated that the Commercial Units are not intended to be offered for sale at the time of the offering.

RESIDENTIAL UNITS

1. General

All Residential Units in the building are Loft Dwellings as defined in the Zoning Resolution.

2. Residential and "Home Occupation" Uses

The Loft Dwelling Units may be occupied by businesses as "accessory uses" under the Zoning Resolution definition of "home occupations". In C6 Districts, the home occupation provision of Section 12-10 shall apply, except that up to 49 percent of the total floor area of the dwelling unit may be used for a home occupation. Refer to the Zoning Resolution for further definition restrictions that apply to permitted uses of "home occupation" areas.

There are twenty-five residential units. Each residential unit is numbered by floor. In addition, Lofts on the 2nd through 10th Floors are lettered N for the North Units and S for the South U

3. Residential Unit Conditions at the Time of Offering:

North Units 2nd – 10th Floors

Units 2N, 3N, 4N, 5N, 6N, 7N, 8N, 9N, 10N:

Master bedroom suite with walk in closet and full bathroom, bathroom, foyer, one living/din kitchen with study alcove, one laundry/mechanical room. The units trash/storage area is off building common corridor.

South Units 2nd – 10th Floors

Units 2S, 3S, 4S, 5S, 6S, 7S, 8S, 9S, 10S:

Master bedroom suite with walk in closet and full bathroom, Two bedrooms with two full bathrooms, foyer, one living/dining / kitchen, one laundry/mechanical room. The units trash/storage area is located off the building common corridor.

Architect's and Engineer's Report

The Franklin Tower at 90 Franklin Street (aka 271 Church Street)

 Page: E.8

Appendix E

Unit Information

6. Light and Air Requirements/Windows:

Under the NYC Building Code, all habitable residential space is required to have direct access to light and air provided by non-lot-line windows.

The light and air requirements shall be as per ZR 112 of the NYC Zoning Resolution, Section 277 of the Multiple Dwelling Law and C26-1205.4 – C26-1205.7 of the Building Code.

Under the Multi Dwelling Law the minimum required ratio of window area to the floor area of a living room shall be 10% where the floor area is less than five hundred square feet or decrease by one percent for every one hundred square feet greater than five hundred square feet of floor area of such living room. Open kitchens are considered as part of the adjacent space where forty percent of the area of the separation between the space is open and without a door.

The required total area of windows providing access to light and air can only be satisfied by non-lot-line windows (i.e. windows along the Church or Franklin Street sides of the building). Lot line windows (i.e. those at the North and East facades) cannot be used to satisfy this requirement.

Unit	Room Name	Floor Area	Req'd Window Area (% of Fl. Area)	Req'd Window Area (SF)	Provided Window Area (SF)
North	Living/Dining / Kitchen *	800	7	56	69
North	Master Bedroom	231	10	23	46
South	Living/Dining Kitchen	795	7	56	184

Unit Information

Residential Unit Areas

The criteria for calculating the area of each unit is as follows:

- To the center line of the demising wall between units.
- To the center line of non-structural common walls.
- To the inside face of common structural walls or elements.
- To the outside face of exterior walls.

Note: Structural elements, such as columns, that fall on the line of the demising wall are apportioned to the units to either side as if the demising line carried straight through them.
